

**AGREEMENT TO ACCEPT
ELECTRONIC TRANSMISSION OF
COMMUNITY ASSOCIATION NOTICES**

Management provides our association with an online communications website at no cost to our association and with the intent to help reduce costs for postage, printing and filing. This tool is only as valuable as the level of participation by our residents.

One function the system offers is broadcast of legally required notices such as annual meeting notices, proposed budgets and regular meeting notices. These are very costly mailings and Maryland Law permits these messages to be sent electronically only if the resident agrees, in writing, to accept electronic notification.

Please help our community control costs by executing the attached agreement and returning it to management. Every penny saved impacts next year's budget and your dues.

I/We, the undersigned owners of one or more units in the community:

hereby agree to accept all community-related legal notices via electronic means. The email address to be used is _____ @ _____. _____ unless we direct, in writing, to use another email address.

I/We understand that electronic notification is permitted by law, with this agreement, and must be discontinued if two messages are returned "undeliverable" by the email host.

Agreed:

_____	_____	_____	_____
Owner	Date	Owner	Date

Please create my account online and send email instruction for access.

Desired Password: _____ (you may change this password after you login)

The User Name will be the email address provided above.

Once you establish your account, please go to Manage Account to change the password and to review your privacy settings. You will determine what, if any, information is made available to other community residents in the online directory. After creating the primary account, the primary account holder may create other users for the household in the My Account/Manage Account section. Use the Resident Role to allow tenants limited access to the site.
