

MAINTENANCE SELF-HELP SOLUTION

STORM DAMAGE

Storms can cause major damage to homes, particularly if there are large trees.

If the damage affects only a fence or a tree has fallen without damaging the property, call the MMI non-emergency number.

Call the MMI emergency line if:

- A tree has fallen causing roof damage
- Windows have been shattered
- Portions of the roof or siding have blown or been torn-off

If there is major damage to the property, seek alternate shelter until you have been contacted by management.
